

# GeoKontrol 2 — GPS Geofenced Speed Control

IoT GPS geofenced speed control. Vehicles automatically adjust speed in 20mph zones, construction sites, or custom geofenced areas — no driver input needed.

## Key Benefits

✓

**Urban 20mph Zones**

Local authorities across the UK are implementing 20mph speed limits in residential areas. GeoKontrol 2 ensures fleet vehicles automatically comply with these variable speed zones — even when the driver is unfamiliar with the area or distracted.

✓

**School Zones**

Speed compliance near schools is critical. GeoKontrol 2 can enforce reduced speeds during school hours and relax the limit outside those hours — automatically, based on the schedule programmed in the zone database.

✓

**Residential Delivery Routes**

Last-mile delivery fleets operating in residential areas can use GeoKontrol 2 to automatically reduce vehicle speeds when entering residential zones, improving safety and reducing noise complaints.

✓

**Construction Sites**

Construction sites have strict speed limits (typically 5–15 mph) that change as the site develops. GeoKontrol 2 allows site managers to define and update speed zones in real time as the site layout evolves, without waiting for physical speed bumps or signage.

✓

**Depots, Warehouses, and Yards**

Vehicle speed in depot areas is a common source of accidents and near-misses. GeoKontrol 2 can enforce 5 mph limits within the depot boundary, then allow normal road speeds once the vehicle exits the gate.

## Technical Specifications

|                     |                                                  |
|---------------------|--------------------------------------------------|
| Operating Principle | GPS geofence-based variable speed control        |
| GPS Receiver        | Multi-constellation GNSS (GPS, GLONASS, Galileo) |
| Position Accuracy   | ± 2.5 metres (CEP50)                             |
| Connectivity        | 4G LTE cellular (SIM included)                   |
| Zone Updates        | Over-the-air, real-time                          |
| Maximum Zones       | Unlimited                                        |
