

TrackSpeed — Speed Limiter + GPS Tracking

The only combined speed limiter and GPS tracking solution on the market. AutoKontrol speed limiter plus ScorpionTrack Fleet GNSS tracking in one device.

Key Benefits

✓ **Most fleet operators buy a speed limiter from one supplier and a GPS tracking device from another. That means two devices, two installations, two contracts, and two periods of vehicle downtime. TrackSpeed eliminates this duplication by combining AutoKontrol's proven speed limiter technology with ScorpionTrack Fleet's powerful GPS tracking platform in a single integrated unit.**

TrackSpeed is the only product of its kind on the market. No other manufacturer offers a combined speed limiter and GPS tracking device. This is only possible because AutoKontrol and ScorpionTrack are both part of the Scorpion Group Holdings family — we control both the speed limiter hardware and the tracking software.

✓ **Speed Limiting (AutoKontrol)**

- Drive-By-Wire electronic speed control - Adjustable speed thresholds - EU/ECE R89 approved - Tamper-resistant sealed unit - GeoKontrol zone-based speed control - Smooth, gradual speed reduction

✓ **GPS Tracking (ScorpionTrack Fleet)**

- Real-time GPS vehicle location - Driver behaviour scoring - Route optimisation - Geofencing and alerts - Journey history and reporting - Web portal + iOS/Android apps
